ELE-TOMES

Ele-Tomes are a unique combination of a periotome and a luxating elevator. The “dimple” above the body of the instrument allows for firm, stable access to the periodontal ligament (PDL) without slipping. Once the PDL is engaged, the body of the Ele-Tome begins to spread the PDL, just like a conventional periotome but without the risk of damage or breakage of the instrument head. The body of the Ele-Tome can now be used like a traditional elevator with luxating force.

#917	Ele-Tome #1	3.0mm blade / 2.3mm tip	\$49.50
#918	Ele-Tome #2	5.0mm blade / 3.0mm tip	\$49.50
#919	Ele-Tome Set	(Both #1 and #2)	\$89.95

The periotome action combined with the strength of the elevator tip of the Ele-Tome allows for less damage to the socket walls and a more atraumatic extraction.
